ORCID: 0000-0003-2735-6771

Maura Vallaro under graduated in 1990 from the L. Casale institute as an industrial chemical expert.

From December 1991 to February 1993 she won a scholarship and dealt with the degradation of pollutants in the sediment/water systems of rivers at the Analytical Chemistry Department of the University of Turin.

From February 1993 to December 2012 she worked at the Drug Science and Technology Department of the University of Turin as a laboratory technician and dealt with organic synthesis of reaction intermediates.

From January 2013 to present she works at the Molecular Biotechnology and Health Sciences Department of the University of Torino as a research technician and deals with the experimental part related to the propensity of compounds to form intramolecular hydrogen bonds (IMHBs).

Work experience and skills:

GC/MS

Organic synthesis

HPLC

T3

UV
